# Maintenance Overview

THE SIMPLE DIGITAL MAINTENANCE TOOL

The Maintenance Overview is a software application that allows you to efficiently manage the maintenance work of your ropeways, vehicles, snowmakers and other units across an entire ski resort using your PC or any mobile device.

In the Maintenance Overview, maintenance plans can be integrated automatically and the Predictive Maintenance Function supports in the planning of future maintenance work for different equipment.

ADVANTAGES

Easy to use on your existing device (PC, laptop, mobile)

Automatic synchronization between all devices

One tool for all areas of the ski resort

Integration of Live Data

Access anytime, anywhere, no network connection required

Automatic integration of standard maintenance plans

Automatic data backup to the cloud

Transparent documentation

Predictive Maintenance Function for efficient planning of upcoming maintenance work

Overview of all maintenance steps and daily checks
