

# Task Manager

# Task Manager

CREATE, DISTRIBUTE AND TRACK TASKS EFFICIENTLY

The Task Manager offers a practical digital solution for the creation, distribution and tracking of various tasks throughout the entire ski resort.

Tasks can be created with one click and assigned to the respective employee. The employee is informed in real time and receives an overview of the tasks that concern them specifically. An alarm function supports the tracking of open tasks which enables the Task Manager to support efficient communication, save time and enable the user, regardless of their location, to maintain an overview of all tasks in the ski resort.

## ADVANTAGES

Easy to use on your existing device (PC, laptop, mobile)

One tool for all areas of the ski resort

Access anytime, anywhere, no network connection required

Automatic data backup to the cloud

Automatic synchronization between all devices

Real-time communication with your employees

Create and assign tasks anytime, anywhere

Specify tasks with comments or attachments

Track the completion of tasks anytime, anywhere

Never miss a task due to the notification service

Overview of all tasks in the entire ski resort

Be informed of the amount of work spent on specific tasks
